Food Dangers

Below is a list of the most common dangerous foods for your pet. If you believe your pet may have ingested one of these items, please call one of the numbers listed above immediately.

Alcoholic Beverages	Can cause intoxication, coma, and death
Avocado	Contain Persin, which can cause vomiting and diarrhea in dogs
Chocolate	Toxic levels possible with the ingestion of 1 ounce per 1 pound of body weight
Coffee	Toxic and affects the heart and nervous systems
Fatty Foods	Can cause pancreatitis
Macadamia Nuts	Can negatively affect multiple systems due to an as-yet-unidentified substance
Moldy or spoiled foods	Contain multiple toxins causing vomiting and diarrhea
Onions, onion powder	Can lead to a severe case of hemolytic anemia whereby the blood doesn't carry enough oxygen to all parts of the dog's body
Raisins and grapes	Can lead to kidney damage and death if consumed in a large enough quantity
Pure Salt	If eaten in large quantities it may lead to electrolyte imbalances
Raw Yeast Dough	It will expand and produce gas in the digestive system, causing pain and possible rupture of the stomach or intestines
Garlic	Can damage red blood cells and cause anemia
Any "Sugar-Free" Product	Might contain xylitol and can cause liver damage and death
Bones	Pose a choking risk or can become lodged in the digestive tract
Mushrooms	Contain toxins, which may affect multiple systems in the body, cause shock, and result in death
